direct your soft light

Patent pending

No tummy. No wearout. No hassle.

That's the butterfly grid you were always waiting for.

Always tight.

Even upside down tightly stretched.

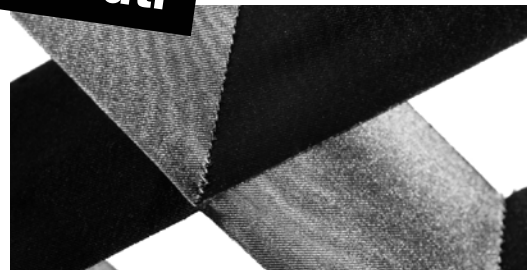

No tummy.

Extremely durable.

Strips neatly sewn. Specially developed robust cloth keeps grid stable.

No wearout.

Simple installation.

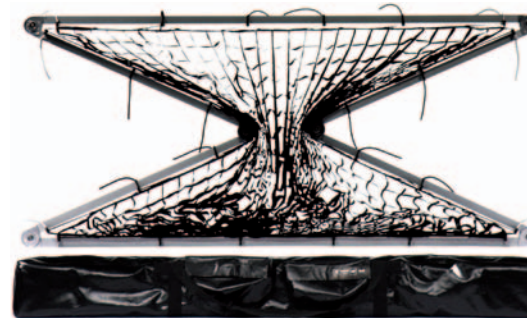

Very simple installation with specially developed brackets.

No hassle.

One minute setup in combination with foldaway frame.

Attach a DoPchoice Butterfly and a diffusion textile to an Avenger Foldaway Frame and take it with you collapsed. At the shooting location it'll take you less than a minute to set it up. DoPchoice even offers a special bag for a safe and comfortable transport.

Compatible to common frames.

□ = 30mm
diameter for rectangular frame profiles.

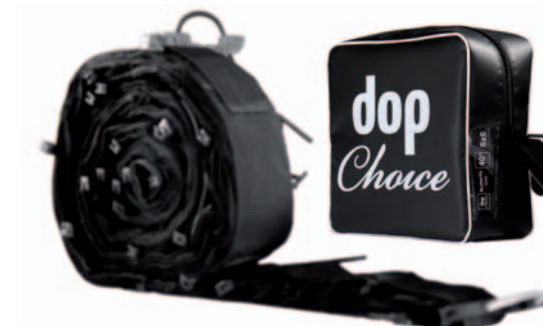

○ > 42mm
Minimum diameter for circular frame profiles.

48mm
Compatible to most common frame solutions, e.g. from Avenger, Matthews, Manfrotto.

Safely stored.

Every Grid comes with a DoPchoice bag made of robust canvas.

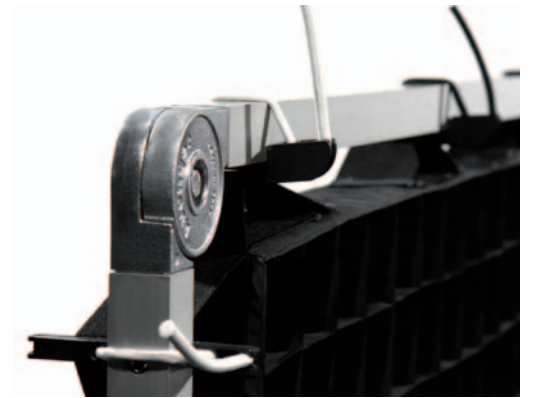

Engineered in Germany. By a DoP for DoPs.

The Founder of DoPchoice was tired of all the ill-conceived lighting solutions at his film locations. Based on his knowledge collected in over ten years working as DoP, associate professor at the University of Television and Film in Munich and lecturer for ARRI Lighting he started to develop new lighting solutions. In 2008 he filed his first patent application for a revolutionary new softbox system and founded DoPchoice in Munich. With the products of DoPchoice his aim is to satisfy highest demands of professional DoPs worldwide.

Easy-to-find corners.

White fasteners show you quickly where the corners of every DoPchoice Butterfly Grid are. It's not a big thing, but a helpful detail.

Stays clean wherever you put it.

When you have to lay the grid down on the floor. The innovative DoPchoice brackets keep a distance from dirt and dust.

A special version for Frost Frames.

Done in a minute.
thanks to the Snapgrid technology
